Personal Profile

Hello, thank you for visiting my profile. I'm Dean, a full-stack web developer with experience as a junior web developer. In this role, I gained valuable insights into business logic and essential workflow processes, constantly seeking to expand my skills and knowledge. I am now eager to pursue new skills and challenges in the field.

Working Experience

Web Developer (October 10, 2023 - Present)

(Myint Thukha Nadi Company Limited)

- Fix bugs, update languages, frameworks, and library versions. Refactor and repair code affected by these changes.

- Collaborate with the team to design solutions that meet customer requirements. Implement frontend designs, handle events, and manage complex user input forms.

- Participate in discussions with the team on database design, authentication, and authorization implementation.

- Developed 2 websites using the TALL stack (Tailwind, Alpine.js, Livewire, Laravel) and repaired 1 old website.

- Developed custom WordPress themes for two websites, ensuring a unique and engaging user experience.

- Implemented responsive design principles to ensure compatibility across various devices and screen sizes.

- Repaired and maintained two CMS websites, resolving issues related to functionality, performance, and security.

Skills
